## 生成邀请码数据库

The screenshot shows the NoSQLBooster for MongoDB interface. The left sidebar displays the 'Connection Tree' with the 'radiks-server-data' collection selected. The main window shows the query results for the 'radiks-server-data' collection. The query is:

```

1 db.getCollection("radiks-server-data")
2 .projection({})
3 .sort({_id:-1})
4 .limit(100)

```

The results table shows 11 documents. The last document (ID 11) is highlighted in red:
